

Fig.1

4-day continuous administration of pramipexol (PPX) compared with a single administration on 4 successive days

5

* $p < 0.05$
** $p < 0.01$
*** $p < 0.001$

Significance vs.
Control

A: Alzet Pump NaCl 0.9 % s.c.

B: Alzet Pump PPX 2.5mg/24h s.c.

C: NaCl 0.9 % s.c.
Single administration on 4
successive days

D: PPX 2.5 mg/kg s.c.
Single administration on 4
successive days

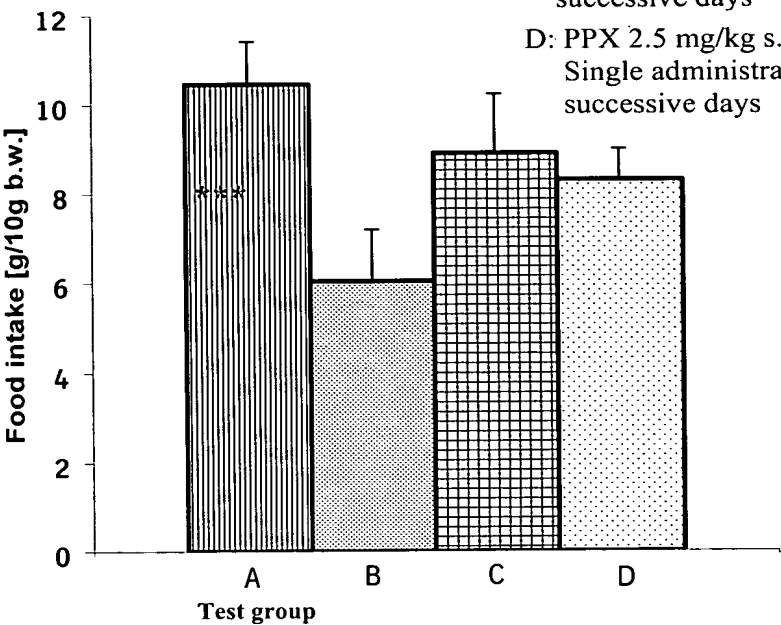

Fig.2

Reduction in body weight during 14 days' continuous subcutaneous (s.c) Infusion of pramipexol followed by 7 days' observation
